

Providing specialist construction services and technology delivery to enhance physical security of new and existing infrastructure assets against blast and weapon effects. We combine global construction experience with specialist blast engineering expertise to deliver project successes as a turnkey design, supply, construct and commission solution.

VSL Infrastructure Protection engaged BFH SYDCON to supply ex works the Palisade Infinity™ anti-climb topping fence, colour matched to the upgraded existing boundary wall. Our Engineering Team conducted a visit to fabrication site prior to dispatch and were impressed with the Quality of the BFH SYDCON product; their supply services matched a tight delivery timeframe.
