TO WHOM IT MAY CONCERN

**REF: BFH SYDCON - PALISADE FENCE DESIGN AND CONSTRUCTION**

We recently provided project management services to a major institutional client in Suva, Fiji. During that time I was witness to the design and construction of a 550m Palisade Fence that was constructed around a technically challenging undulating site that had limited and restricted access requirements.

BFH Sydcon supplied the fence, provided design drawings for the fence and some supervision services to a separately appointed installing contractor.

The fence proved to be a robust, well designed, cost effective, simple solution that allowed for a shortened construction period. It also allows for easy reticulation of power and data services.

As such I recommend this product to any prospective clients of BFH Sydcon.

Yours faithfully,

**KRAMER GROUP**
